

Fall event 2019 for Junior Epidemiologists

Meet the cohorts!

When? Thursday 28th of November, 13:00-18:00

Where? The Jack Rabbit, Utrecht

Registration deadline? 15th of November

Make sure you register on time by sending an e-mail to:

secretariaat@epidemiologie.nl

Please include your name, position/function and institute in this e-mail

Meet the cohorts!

Most epidemiologists spend their time on studying datasets. Cohort studies are important resources to study associations of your interest. In the Netherlands alone, there are plenty of nice ongoing cohort studies focused on different predictors and outcomes. Do you know them all?

We are proud to announce the contributions of four Dutch cohort studies: the Maastricht Study, the Doetinchem Cohort Study, Geoscience and Health Cohort Consortium (GECCO) and Prevention and Incidence of Asthma and Mite Allergy (PIAMA). The contribution of each cohort study consists of a presentation from both a senior and junior investigator.

The meet and greet with the representatives from these cohort studies is a great opportunity to ask questions and to figure out whether this work might be something for you.

We invite all junior epidemiologists (master students, PhD candidates, postdocs and everyone interested in epidemiology) to the fall event for junior epidemiologists: **Meet the cohorts!**

VvE Taskforce Junior Epidemiologists

Dorien Kimenai (Maastricht UMC+)

Kay Deckers (Maastricht University)

Lisanne Verbruggen (Prinses Máxima Centrum for Pediatric Oncology)

Famke Mölenberg (Erasmus MC)

Program

Thursday 28th of November

Introduction

13:00-13.20 Registration
